Exploratory event context: voltage, current, off fraction and unequal calendar duration
E1: target rows 3112/3113, 50 observed bins
E2: target rows 3627/3628, 50 observed bins
Observed cell voltage (V)
Mean current (A)
Zero-current fraction
Calendar span per bin (h)
Row offset from first core target (0.5 operating h / row)
