Core paper evidence
Frozen141 cycle
observations
(+5: audit only)
Frozen Ridge96
H1/H2/H3 cycles
Auxiliary reference
Voltage retention proxy
Reference0.713830V
Not standard SOH
7 polarization events
Sparse SOH reference
Past-only M2_NC context
Recommendation C: retain dynamic TFT; no target replacement or new training now.
2703 QC dwells belong to146 cycle blocks from one life trajectory.
A future health TFT requires a new target contract, causal qualification and fresh paired ablation.
