Three frozen seeds per model; bars = mean, whiskers = sample SD
Train (in-sample)
1380 origins / 33120 targets per seed
Validation (reused)
205 origins / 4920 targets per seed
Historical assessment (exploratory)
378 origins / 9072 targets per seed
Late-life (exploratory)
548 origins / 13152 targets per seed
RMSE (mV)
