F2 architecture: inherited TFT modules and added history-path fusion
Original encoder hidden / cell
Past scaled input
[B,48,14] + time index
Native encoder VSN
[B,48,64]
Native LSTM encoder
post-LSTM residual/norm
Added causal CNN path
k3,d1 and k3,d4
concat ->1x1 +residual/norm
Encoder feature fusion
g LSTM +(1-g) CNN
[B,48,64]
5 historical regime means
5->8(ELU)->1(sigmoid)
one scalar g / history
g
Native LSTM decoder ->[B,24,64]
External input: relative step only
Initial state: encoder hidden/cell
decoder output
Concat encoder48 + decoder24
Native enrichment / attention / output head
24 direct standardized DeltaV predictions
